

DATA SCIENCE

Delivery Time Analysis for an Ecommerce Company:

Question 1: Calculate Q1 and Q3

$$Q1 = 0.25 \times (n+1) \quad Q1 = 0.25 \times (n+1)$$

$$Q1 = 0.25 \times (n+1) \quad Q3 = 0.75 \times (n+1) \quad Q3 = 0.75$$

$$\times (n+1) \quad Q3 = 0.75 \times (n+1) \quad \bullet Q1 = 4\text{th}$$

$$\text{value} \rightarrow 40 \quad \bullet Q3 = 11\text{th value} \rightarrow 75$$

Question 2: Find the IQR

$$IQR = Q3 - Q1 = 75 - 40 = 35$$

Question 3: Detect Outliers Lower

$$\text{Bound} = Q1 - 1.5 \times IQR \quad \{\text{Lower Bound}\} = Q1 -$$

$$1.5 \times IQR \quad \text{Lower Bound} = Q1 - 1.5 \times IQR$$

$$\text{Upper Bound} = Q3 + 1.5 \times IQR \quad \{\text{Upper Bound}\}$$

$$= Q3 + 1.5 \times IQR \quad \text{Upper}$$

$$\text{Bound} = Q3 + 1.5 \times IQR$$

2. QUESTION-MEAN, MEDIAN, MODE:

Mean:

$$45 + 50 + 55 + 60 + 60 + 62 + 63 + 65 + 90 + 95 \div 10 = 6$$

$$5.5\{45 + 50 + 55 + 60 + 60 + 62 + 63 + 65 + 90 + 95\}\{10\} =$$

$$65.51045+50+55+60+60+62+63+65+90+95=65.5$$

- Median: Middle value = $(60+62)/2=61$
 $(60 + 62) / 2 = 61$
 $61(60+62)/2=61$

- Mode: 60 (Occurs twice)

3. DETECT MULTICOLLINEARITY:

Calculate the Variance Inflation Factor (VIF).
 ○ VIF > 10 indicates multicollinearity.

- Answer:

High VIF means the variables are correlated, impacting model accuracy

4. HYPOTHESIS TESTING:

H₀: The medicine doesn't lower blood pressure.

H1: The medicine lowers blood pressure.

T-Test: Find the p-value (a number that shows how likely the result happened by chance). If $p\text{-value} < 0.05$, it means the medicine likely works.

5. DETECTING OUTLIERS:

- Calculate the Interquartile Range (IQR).
- Step 2: Identify outliers using the formula: $\text{Outliers} = (\text{Data} < Q1 - 1.5 \times \text{IQR})$
 $(\text{Data} > Q3 + 1.5 \times \text{IQR})$
- $\text{Outliers} = (\text{Data} < Q1 - 1.5 \times \text{IQR})$
 $(\text{Data} > Q3 + 1.5 \times \text{IQR})$

6. Understanding Customer Satisfaction:

Answer:

- Find the Mode to see the most common rating.
- Calculate the Mean and Median for further insights
